General Information

**Pile reversal:** All cut pile carpets can suffer from pile reversal and in certain instances this may become permanently bent or distorted for no specific reason that research has yet identified, giving areas of light and shade. This is also known as 'Shading' or 'Watermarking'. It is not a defect in manufacture, it only occurs in a small percentage of all carpets and no liability whatsoever can be accepted by the manufacturer in respect of it.

**Pile pressure:** All cut pile carpets are liable to show light and dark patches resulting from disturbance of the pile created by foot traffic or brushing. This is a normal feature and is not a defect in manufacture and no liability whatsoever can be accepted by the manufacturer in respect of it.

**Pale shades:** We include within our collection a number of pale shades. Primarily these are used as top or highlight colours. These more delicate shades will invariably tend to soil more quickly and give a lower level of light fastness than the norm, and may show natural blemishes within the fibre that tend to be masked in deeper shades containing a greater quantity of dye.

Installation

To be installed in accordance with BS5325 "Code of Practice for the installation of Floor Coverings" and NICF manual. Pattern match cannot be guaranteed with any pattern tufted carpet.  
For quantity orders requiring colour matching, please state at the time of ordering.  
All samples may not be from the same production batch as current stock and therefore should be used as a guide and not as an exact match.

Maintenance

Hugh Mackay & Whitestone Weavers recommend that this carpet is maintained in accordance with an agreed maintenance schedule which should include the following:

- i). Vacuum regularly.
- ii). Remove spills immediately.
- iii). Professionally clean as required.
